(U) PREFACE:

(S/NF/SG/LIMDIS) The Special Activity Report is the second in a series of reports which provides data in response to a request from Joint Task Force Five (JTF-5) in Alameda, California. The data provided in this report will be used by the J22 division in their assessment effort regarding their counterdrug mission. The information provided in this report was generated by PAG-TA employing remote viewing (RV) methodologies.

SG1B (S/NF/SG/LIMDIS) The data provided in this report is the second in a series of taskings. This project concentrated on the target vessel [REDACTED]. The results were forwarded to JTF-5 by secure fax on 25 March 1994. The JTF-5 evaluation feedback is at Appendix B.

(S/NF/SG/LIMDIS) The methodology used in this activity is exploratory. Results should not be considered as stand-alone; but used or evaluated in conjunction with other proven data sources (HUMINT, SIGINT, IMAGERY, OPEN SOURCE, and/or MASINT). Generic data (e.g., general shapes) are more reliable than specific data (e.g. dimensions, names).

(U) DATA SUMMARIES:

(S/NF/SG/LIMDIS) Following are the perceived highlights from each source.

- (S/NF/SG/LIMDIS) Source A:  
SG1B

-- The target [REDACTED] is a small light vessel which has some of the color red with dark lettering. The people aboard are few in number and one may be female. Another crew member is a male who has been injured or is ill. The boat is disguised in purpose perhaps as a fishing vessel or for divers. There are scuba divers aboard [REDACTED] are on the receiving end of a drug drop from either another boat or likely from a plane. The scuba divers aboard the [REDACTED] pick up crates from the ocean floor near rocks or reefs off the coast and deliver the drugs to a major city port. The crates have contained therein a green flaky substance like marijuana although some cocaine may be involved. These individuals are small time drug receivers or dealers. The connection will be completed in April.

- (S/NF/SG/LIMDIS) Source B:

-- The target is a large, sleek white colored vessel with bright blue trim. It is extremely fast. It's bow is steeply angled and it cuts through the water in a dramatic manner (sketch a).

-- There has been some recent repairs made to the target; to repair a large gash in the hull. There is an image of large, jagged, square-shaped damage as if a section of the boat had been sheared off. There is also a sense that the target has had some changes made to its original design; something associated with detection or sensing. The power of the target has been altered as well.

-- Contradictory sense of bellowing fabric with that of a high speed prop spinning through water.

-- The following concepts, objects and/or features were perceived to be associated with this target:

--- the numbers 741 or 417.

--- oblong wooden crates with unusually thick sides.

--- the image of individual fish packed in tubes; the tubes, in turn, are packed and supported by a white, foamy material on either end. These are then secured into blocks which are cubed-shaped.

--- the design or configuration of an on-board toilet is not typical of this vessel.

--- large cylinders with heavy rope wound around them.

--- a wooden gazebo-type structure located at the end of a long walkway which is suspended above the water (sketch a).

--- old, leather bound books and an elaborately ornate wooden chest.

--- a man performing a cranking action; adjusting rope.

--- a circular, flat disc which slowly rotates; this feels foreign or out-of-place on the target.

SG1B

---

--- a large, cone-shaped object reminiscent of a dip net or "collection" apparatus used for collecting small bait animals.

- (S/NF/SG/LIMDIS) Source C:

-- The target consists of a vessel that has been suspected of carrying contraband in the form of illegal drugs in the past. This vessel is currently sailing in a northern direction from its destination and will reach its port of call within the next seven to ten days. The vessel can be considered medium to small.

-- The target vessel may run into difficulty (either mechanical or weather) in the near future that may delay it reaching its port of call on time.

-- The vessel may be carrying contraband now. If it is, the contraband is stored in square yellow or tan boxes that can be opened by a key. The boxes of contraband are stored near the front of the ship below deck.

-- The captain of the vessel is well aware that contraband is on board.
